

The supplemental material contains the stimuli for one of the examined sentences ("Der Lappen liegt auf dem Eisschrank"), which was originally spoken with seven emotional expressions. There is one audio file for each emotion, containing first the original utterance re-synthesized as good as possible with regard to phonation type, phone duration, and pitch, and then the same sentence with the phonation type replaced by purely breathy voice, purely modal voice, and purely pressed voice, respectively.

Furthermore, the screenshot of Figure 2 is included in the supplemental material.
